About the House

The House of Devereaux not only specializes in custom design but a variety of styling services under the umbrella of Style X (BY) Devereaux. The mission of Style X Devereaux is to assist women in cultivating their personal style and increasing their self-confidence.

As a designer/stylist, it is my hope that clients feel secure in their inward appearance. As a woman, it is my hope to assist clients with empowering their inner self so that your confidence may shine through your outer appearance.

My goal is to ensure that my services provide fashion as well as functionality.

Founded in early 2018- we began as a full styling service and expanded in power suiting and styling for the "professional woman redefined" by revamping styles and creating "new classics" with the belief that we must build the confidence of each client from the inside outward.

The modern day Devereaux professional is not just your typical 9 to 5 working woman, but also the entrepreneur looking to make waves in her industry, or the woman who wears many hats such as wife, mother, however, she still understands the importance of carving out time to take care of herself.

She appreciates being the only person wearing something in the room and people take notice. She values quality, luxury clothing with attention to detail that not only properly fits but can be transitional throughout her wardrobe.

Every custom piece is made from the finest of fabrics and lined with our signature leopard print made of 100% genuine silk.

We currently have two collections- ALPHA & BETA with a 3rd collection, TRES CHIC in the works for a Q1 2021 release.

Our motto is #itsallinthedetails
and our House Philosophy is "people will stare- make it worth their while"
- HARRY WINSTON

ALPHA

Collection

Our premiere collection inspired by powerful women of silver screen, whose performances and presence, both on-stage and off warranted a round of applause- the ALPHA Collection speaks to their personas with bold color, texture in our trims and drama in our design accents

BETA
Collection

Our second collection pulled inspiration from women known personally as well as admired through pop culture. They represent the duality that women are often coaxed into by societal norms, and pay respect to how they managed to maintain a sense of self while beating the odds- that's what made them BETA. This collection utilizes hardness/strength through its tailored structure and use of specific trims and softness through color to represent the dichotomous lifestyle of the BETA woman.
